## EDUCATION

<b>Rice University</b> <i>M.S in Computer Science</i> GPA: 3.73/4.0	<i>Aug 2023 – Dec 2024</i> <i>Houston, TX, USA</i>
<b>Manipal Institute of Technology</b> <i>B.Tech in Computer Science</i> GPA: 3.45/4.0	<i>Jul 2018 – Aug 2022</i> <i>Manipal, KA, India</i>

## EXPERIENCE

<b>Rice University</b> <i>Software Development Intern</i> (C++, CUDA, Python, GitHub Actions, LLMs) <ul style="list-style-type: none"><li>Developed Ein-Summable - A system to help run Machine Learning tasks efficiently across multiple computers.</li><li><b>Integrated Llama 3</b> with CUDA for GPU-accelerated inference, <b>reducing latency and boosting LLM Inference speed.</b></li><li>Set up CI for automated testing, <b>streamlining the development process by 50%.</b></li></ul>	<i>Houston, TX, USA</i> <i>May 2024 – Dec 2024</i>
<b>UBS</b> <i>Software Engineer</i> (Java, SpringBoot, Oracle SQL, Kafka, Shell Scripting) <ul style="list-style-type: none"><li>Led bi-weekly code release activities; Deployed application enhancements; improving client satisfaction by 30%.</li><li>Designed and integrated Shell Scripts that <b>slashed manual workload by 15%.</b></li><li>Monitored application logs, analyzing database discrepancies, <b>leading to 40% reduction in errors</b> and enhancing overall system stability.</li></ul>	<i>Pune, MH, India</i> <i>Jul 2022 – Jul 2023</i>
<i>Software Engineering Intern</i> (Python, Oracle SQL, Unix, Agile, Scrum) <ul style="list-style-type: none"><li>Automated mapping of ESG files, <b>reducing manual effort by 70%.</b></li><li>Analyzed downstream data, uncovering key trends and insights; <b>improving quality of deliverables by 60%.</b></li></ul>	<i>Jan 2022 – Jun 2022</i>
<b>NTT Data Payment Services</b> <i>Product Engineering Intern</i> (Java, JUnit, Mockito, SpringBoot, SonarQube) <ul style="list-style-type: none"><li>Extraction of Merchant IDs using Python; <b>Reduced errors in pre-processing by 80% by eliminating faulty IDs.</b></li><li>Implemented Unit Test Cases for an Online Transaction Switch (OTS) and <b>ensured code coverage to be greater than 90% using SonarQube.</b></li></ul>	<i>Mumbai, MH, India</i> <i>Jan 2021 – Sept 2021</i>

## PROJECTS

<b>URL Shortener</b> <ul style="list-style-type: none"><li>Leveraged <b>GoLang</b> for its high-concurrency support and efficient performance under heavy workloads and <b>achieving reduced latency.</b></li><li>Utilized MongoDB for its horizontal scaling capabilities, <b>optimizing URL retrieval and storage for high-speed operations.</b></li><li>Simulated 1000+ concurrent requests using tools like Locust, performing detailed stress tests that <b>ensured 99.9% uptime and validated the systems scalability.</b></li></ul>	<i>Rice University</i>
<b>Brain Tumor Detection with EfficientNet-B0</b> <ul style="list-style-type: none"><li>Improved Pre-Trained models (EfficientNet-B0) using hyperparameter tuning, <b>achieving 97% test accuracy on a custom MRI dataset.</b></li></ul>	<i>Rice University</i>

## TECHNICAL SKILLS

<b>Languages:</b>	Python, Java, C/C++, JavaScript, Go
<b>Databases:</b>	Postgres, MS SQL Server, Oracle SQL DB, MongoDB
<b>Libraries/Frameworks:</b>	Django, PyTorch, Spring Boot, JUnit, Mockito, ReactJS, NodeJS
<b>Other:</b>	Kubernetes, Elasticsearch, MapReduce, Apache Spark, Git, Jenkins, GitLab CI
